Equine Laminitis Clinic

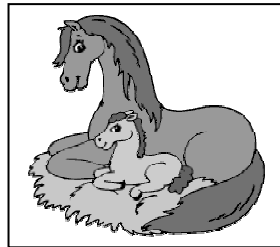

You are invited to a presentation on equine laminitis. Topics to be covered are: Founder, Cushing's Disease, low thyroid, Metabolic Syndrome, tying up and dietary management.

Presenters will be Jessica Hafemann and Ron Genrick

Thursday Jan 21st, 2010, 7- 9pm

MN Valley Vet Services Office

Cookies and beverages will be provided.

Annual Coggins Clinic

Our annual Coggins clinic will be held on March 27th from 9AM to Noon. There will not be an office charge for horses brought in for Coggins and/or vaccinations. Horses vaccinated at the Coggins clinic will receive a free wellness exam.

Hope to see you there!!

Early Vaccination for Your Pet

If your pet has vaccinations due in April or May, we would suggest you move them to February or March. This will insure that your pet is vaccinated before the mosquito and tick season. The vaccine will be in a very high potency during the time of highest risk for insect carried disease. Our schedule has more availability during these months and we will be better able to accommodate your schedule. Give us a call and let us know if you would like to schedule your pet for early vaccinations.

Save the Date

Laminitis clinic – January 21st 7:00 pm

Dental Month – February

Coggins Clinic – March 27th 9 to 12
