

PLEASE, PLEASE, Clean Up Your.....

Manure isn't great to "look at", but even less enjoyable to "step on" for pedestrians or "ride through" for bikers.

A flyer with the following information was handed to a horseback riding gal at 7-Mile park on Sunday, April 23, 2006. The deliverer was the maintenance person who constantly reminds riders that horseback riding may be omitted from the park's "allowed" activities if riders don't stop to clean their manure from the trails. On this day, this horseback riding party spent a whole lot of time on the trail taking turns getting off and kicking off other people's "droppings"!

If everyone took responsibility for their own manure droppings, we will keep our riding privileges at this beautiful park. ***Please Do Your Part!***

ATTENTION HORSEBACK RIDERS

We have all enjoyed riding the Nicollet County Park for a number of years now. The park has hosted riders from all over, not just the locals. But now, we must ask that you help out or we will loose this park for horseback riding. We need to pick up the horse droppings that fall on the west side!!!! There are NO exceptions! If you can't do it yourself, have someone else do it! A boot, stick, or small rake will handle this responsibility! As contributors to this park, we would like to see that we can continue to enjoy this wonderful place! Thank you!
